MOUSE is little but powerful.
SCREEN shows what is going on inside.
MEMORY remembers good things (and bad too.)
KEYBOARD sends commands for good deeds.
PRINTER helps us share what we produce.

Being a missionary by telling others of the joy and peace of accepting Christ as their Savior is not reserved just for grown ups. The Gospel message is so simple and straight-forward that even preschoolers can teach others of God's matchless love that starts at the Cross.

Fold along dotted line (3 places)

DIRECTIONS:

1. Trim around the outer edge of the Laptop template.
2. Either use the cutout as a template to cut the shape in cardboard and then use a marker to Draw the keyboard etc. or,
3. Glue the entire cutout onto the cardboard. You may have to cut along the fold lines.

Larry Laptop

Larry Laptop is a fun way to put pre-schooler computer curiosity to good use. Be sure to have adult on hand cutting out the laptop. Next, cut out, or make your own, "programs" like the two below. The children can pretend they are programming Larry the Laptop by pointing to the keyboard letter as they see them on the "program screen." This is a good tool to teach preteens how to disciple younger youth. A typical computer system is depicted by Larry as the SCREEN, MEMORY, KEYBOARD, PRINTER, and MOUSE.

Now is a very good time to begin to teach them that God gave us computers to safely use for Him.
